

World Psychology Books

World Psychology opens up a vast new framework with which to view ourselves, our lives, lovers, friends, children, work, education medicine, ecology, sexuality; taking us in a modern way to the roots of our existence.

The Social aspect of World Psychology threads the needle through all the important issues that are confronting humanity, recognizing that Western civilization, that way of organizing society around individualism, market capitalism, democracy and the Scientific Method are now in irremediable decline.

On the Individual level World Psychology offers personal help with health and healing. In his books, Mark Sircus offers basic information on the deepest intimacies of life: revolutionary new approaches to medicine, psychology, communication and conflict resolution; sexuality, love relationships, longevity, religion and spirituality.

This site presents the eBooks in the **World Psychology Series** written by Mark Sircus. Each eBook is available by secure transaction at ClickBank. So you can see what the books are about we have included a full chapter of each book below.

These are the World Psychology books by Mark Sircus...

1. World Psychology

This book is dedicated to all of us who can see that we are the problem and thus the solution. For all of us who care and carry a vision in our hearts for creating a better world for our children. For all of us who have the courage to face ourselves and see what we needs to be changed. Mark Sircus offers a penetratingly deep look at where the world is now and where it is headed in the near future, and opens up a vast new framework, a World Psychology, a new basis to view ourselves, our lives, lovers, friends, children, work, economy, education, medicine, ecology, sexuality; taking us in a modern way to the roots of our existence. (276 pages, US\$ 15.00)

2. HeartHeath - The Psychology of the Heart

This work offers us a journey into the pureness of our beings, back into the heart center. Few people have been able to explain why one person falls ill and others do not. Denial of feelings, or repression of feelings in any way, gets mirrored almost immediately in the immune system. The immune system is tied directly to the whole, to every aspect of our health and life. Deep in our hearts we know that love is essential to our health, essential for harmony to exist in our inner beings. (172 pages, US\$ 15.00)

3. The Heart of Sex

The Heart of Sex offers us true revolutions in the most intimate areas of our lives. This work plants new and intelligent images that will guide us to the sweetest heights of love if we apply them in our personal lives. In this volume we explore the most sensitive issues of love, sex and intimacy with the overall goal of *linking up our heart centers to our sexuality*. There are purposes unseen and unknown to sex but from the beginning it motivates us to reach out to others, provoking us to communicate and begin a dance that we hope will lead to deeper connection with others. As we enter further into it we begin to mix our destiny with our lover, exchanging energies on deeper and deeper levels. Whether we bring a new life to this world with it or not it has been given to us by the cosmic intelligence for the high reason and purpose of creating more love in our lives. (267 pages, US\$ 15.00)

4. The Marriage of Souls

Our pure beings need pure love, deserve pure love, live on pure love. **The Marriage of Souls** is about pure beings sharing pure love. The pure light of pure being - perfectly vulnerable, perfectly feeling, perfectly real. When the vulnerability of being meets up with an equal vulnerability of being a strong bonding force is naturally set up between these two beings. Open hearts can do nothing but love and when two such hearts meet explosions of love are made manifest and there is nothing we, or anyone else can do about it. No power on earth can dissolve the love of two persons if that love be true. In the name of pure love **The Marriage of Souls** offers us a true revolution and a complete spiritual paradigm shift that finally brings fundamental change to our race consciousness. And to the basic structure of society through changes in the basic family unit. (200 pages, US\$ 15.00)

5. Cry of the Heart - The Medical Terror of Vaccinations

On the physical, intellectual and moral strength of the children of today the future rests. The last thing that we would expect to find working to diminish our children, even to the point of taking away their very lives, is a deliberate attack on their immune systems. A strong case can be made that using 'toxic' medications and vaccines only reduces the efficiency of the immune system and the general health of living organisms. There is a growing groundswell of people around the world who are accusing the medical profession and many major international companies and organizations of deliberately weakening the strength and health of the young through vaccination programs. **Cry of the Heart** offers in-depth reports on the personal histories and scientific evidence about this issue. (US\$ 15.00)

6. Interactive Course in Color Psychology

You are a Rainbow! Yes you are and you do not even know it! We are all rainbows. The true secrets of Color Psychology can open up a fascinating world of mystery, fun, and deep understanding. Color Psychology can also help us understand those around us who seem so different. Color Psychology offers us the clearest key to understanding the mind and how it functions and thus how it can be used. And yet because the antecedents of this psychology are steeped in ancient knowledge, modern psychologists have denied its importance.

Actually the rainbow is at the heart of everything and is a universal constant across the entire electromagnetic spectrum and thus across all levels of life. We are rainbows and our minds operate and resonate differently with each spectral color. In fact each color shapes the function of each level of mental activity. To understand our minds and personalities down to their very roots we must study the foundation stones of the mind and how consciousness forms differently on each level of mental perception. (63 pages, US\$ 15.00)
